

Cybersecurity Leadership Program

Program Dates: May 20 - 22, 2024

The Cybersecurity Leadership Program at Duke University, a combined effort of the Pratt School of Engineering, Sanford School of Public Policy, Department of Computer Science, and Duke Law School brings together private sector leaders from various sectors and government officials for an intensive three-day program. This year, the program is offered in conjunction with the new Duke University CISO Certificate.

Core Curriculum Topics

- Cybersecurity & the Board
- Challenges for the CISO
- Elements of a Cyber Program
- Impacts from Incidents
- Responding to a Data Breach

Participants will have the chance to learn from Duke scholars in policy, law, engineering, business, and computer science, as well as from leading industry and government experts.

About the Program

Participants will engage with a world-class faculty from academia, government and industry on topics at the intersection of technology, law, and policy. By the end of the program, participants will be able to do the following:

- Identify and address cyber-related risks to organizations;
- Develop best practices relating to supply chain and other third-party risks;
- Better equip their organizations for engaging with government regulators and law enforcement agencies in the U.S. and abroad.

*No policy, legal or technical experience is required.

Tuition Coverage

Tuition for the program is **\$4,000** and covers the following:

- Faculty instruction from Duke faculty and expert guest speakers;
- Program lunch breaks and evening mixer events;
- Access to all course materials, session recordings and additional resources;
- Staff support during the course of program.

Who Should Apply

Duke's Cybersecurity Leadership Program will be ideal for a range of senior leaders with responsibility for:

- Membership on a corporate board of directors
- Senior management who will need to receive briefings from the Chief Information Security Officer
- Finance with responsibility for oversight of information security investment
- Senior government leaders who need to make decisions impacted by cybersecurity risk
- Lawyers who need to provide guidance on cybersecurity risk
